CLIPPER LANCELOT	2004-10	Colas Trader Ltd., Bahamas
ALICE	2010-	Foster Shg. Co. Ltd., Hong Kong

GENERAL VESSEL INFORMATION:

ATTEMPTS to refloat the bulker **CLIPPER LANCELOT** failed over the weekend following its grounding on the morning of 9 December in the Magdalena River, Columbia. The Sociedad Portuaria Regional de Barranquilla terminal at Barranquilla has remained closed following the incident with three vessels unable to depart from the berths. The 28,426dwt, Bahamas-flagged bulker ground between buoys 12 and 13 close to the river entrance while approaching the terminal with a cargo of maize and soya from New Orleans, US. Efforts to pull the vessel from the sandbank by three harbour tugs have so far been unsuccessful, with the river current hampering the operation. The latest incident is likely to damage SPRB's reputation, which had been promoting itself for grain shipments. Last year, three vessels grounded in the river. The **CLIPPER LANCELOT** was built in 1997 and is owned and operated by the Clipper Group.
