GENERAL VESSEL INFORMATION:

08/09/2016:

Bordkran-Nachrüstung für neue Charter

Containerschiffe der Größe 2500 bis 3000 TEU ohne Ladegeschirr sind derzeit auf dem Chartermarkt weltweit kaum noch gefragt. Die Hamburger Reederei NSC Shipping hat sich deshalb entschlossen, vier 2872-TEU-Carrier vom Typ "Andes" nachträglich mit Bordkranen auszurüsten.

Die "Andes" und ihre Schwestern "Andino", "Arica" und "Algarrobo", in den Jahren 2007 bis 2010 von der YangFan Shipyard in Zhou shan an NSC geliefert, werden demnächst mit jeweils drei 45-Tonnen-Kranen des Herstellers Liebherr-MCCtec Rostock auf den Weltmeeren unterwegs sein. Die Umbauarbeiten übernehmen eine polnische Werft, Liebherr in Rostock und German Dry Docks in Bremerhaven. Auch die Zahl der Kühlcontaineranschlüsse wird erhöht – von 746 auf etwa 900. Für alle vier Einheiten schloss NSC einen Zeitchartervertrag mit Hamburg Süd ab – zunächst für 24 bis 30 Monate, mit Option auf Verlängerung. Zur Charterrate macht NSC keine Angaben, sie soll aber "deutlich über dem derzeitigen Marktniveau" liegen.

Den Anfang macht die "Algarrobo". Sie traf nach vorbereitenden Arbeiten in Polen am 10. August bereits unter dem neuen Charternamen "Cap Roca" zur Kranmontage bei Liebherr in Rostock ein und soll am 22. September in Hamburg in Beladung gehen. Die "Andino" wird – ebenfalls aus Polen kommend – voraussichtlich am 1. Oktober als "Cap Reinga" an der Rostocker Liebherr-Pier festmachen und Anfang November zur Beladung nach Hamburg kommen. German Dry Docks in Bremerhaven buchte den Umbauauftrag für die "Andes". Das Schiff erreichte die Werft am Mittwoch und soll in 40 bis 45 Tagen wieder in Dienst gestellt werden. Ebenfalls noch vor dem Jahresende sollen die Arbeiten auf dem Schwesterschiff "Arica" zum Abschluss kommen

(www.thb.info - 15. September 2016)

NSC Shipping (Germany) decided to upgrade four 2872-TEU ships ("ANDES" class) with 3x45t cranes at Liebherr-MCCtec, Rostock (Germany).

These vessels were delivered gearless by the Yangfan Group in the period of 2007-2010.

This decision was made due to the observed declining demand for gearless containerships in the 2500-3000-TEU segment on the international charter market.

Additionally, the reefer intake has been boosted to 900 plugs.

In the containership sale and purchase market, the 2007-built 2,872 teu containership Arica was sold in an auction led by the ship's creditors. The vessel was acquired by Robin 4 Shipping for \$6.5m, lower than VesselsValue's valuation of \$7.2m. The ship was owned by German owner NSC Holdings. It was arrested in the US by creditors and since then many more creditors joined the lawsuit against the ship's owner. The ship was ordered to be sold in June by a court.
