In June 2008, Damen had the honour of delivering the first vessel built according to a new design to buyers 'Unisea Shipping'. Although engineered to meet the Swedish-Finnish Iceclass 1A, the vessel's maiden voyage will take it to the Caribbean. The **'BEAUTRIUMPH'** is equipped with two 40-ton cargo cranes and full tween decks in the two holds. A tank top load of 17 tons/m² ensures full flexibility in terms of cargo to be transported. With a high specific hold volume (10.510 m³) and deadweight of 7.210 tons the **'BEAUTRIUMPH'** is a true multipurpose vessel.
