SALES, TRANSFERS & RENAMINGS:

CORAL ESSBERGER	1981-06	Chemical Tanker Service East Pte. Ltd., Singapore
PROTI	2006-	Chem-Say Shg. Ltd. Inc., Panama

GENERAL VESSEL INFORMATION:

In the summer 1990 before the lock of the North-Baltic Sea*-canal a vehement collision between the chemistry-tanker " Coral Essberger " and a mid-sized container-vessel was occurred. The " Coral Essberger " became badly damaged within the amidships-area and ripped open completely 2 cargo-tanks made of stainless steel. Despite high utilization of the shipyard to this time, the shipyard got the surcharge for this job thanks to their outstanding reputation as repair-place. The chemical-tanker was repaired within not even 4 weeks and was handed over at the shipping company again.
