KAVO ALKYON	2005-	Falcon Ventures S.A., Greece

GENERAL VESSEL INFORMATION:

Sanoyas Hishino Meisho Corp. Has delivered the 75,409DWT Panamax bulk carrier, **KAVO ALKYON** (HN: 1231), to Falcon Ventures S. A. at the Mizushima Works and Shipyard of Sanoyas. This carrier is the 33rd of the 75,500DWT class, which has the maximized deadweight as a Panamax bulker developed by Sanoyas. Seven cargo holds are provided in the center of the hull. The cargo hold has top side tanks and hopper bottom. The upper deck is the flat type, and the engine room and the living quarters are located aft. The hatch covers are the side rolling type, and opening and closing are achieved by chains and hydraulic drives.

The main engine is a low-speed, long-stroke, and 2-cycle diesel engine, and a large-diameter propeller is used. This combination achieves low fuel consumption.

Principal particulars

L (o.a.) x L (b.p.) x B x D x d: 225.00m

x 217.00m x 32.26m x 19.30m x
