A P Møller-Mærsk has reportedly sold three older container carriers to Mediterranean Shipping Company, MSC, for an undisclosed sum. A P Møller-Mærsk has not made any comments so far. The sold ships are the 1990-built Magleby Mærsk, Marie Mærsk and Majestic Mærsk. They are sister vessels in a series of twelve units on 66,400 DWT and 4,400 TEUs.

Here, the MSC VERONIQUE is seen in 2015 upon arrival at Rotterdam.

MSC sells former Maersk flagship for scrap at age 34

MSC has sold the 1989-built 4,809 teu panamax MSC VERONIQUE to a cash buyer that will recycle the vessel in India.

Chinese sources report that the vessel fetched USD 550 per metric ton. At a lightweight displacement of around 23,450 metric tons, the ship is believed to have changed hands for USD 12.9 M.

Her mixed deck load shows that, at the time of the photo, the ship was chartered out by Maersk.

Since the charter was only fairly short, she continued operating under her original Maersk name.

This vessel was sold to MSC in 2010 and she still serves with her current owners today. Dry-docked as recently as 2022, the MSC SARISKA V will likely be the longest lasting ship of her type.

The world's oldest active container ship: MSC MALIN

photo: C. Costa

The question to identify the world's oldest active container ship is not an easy one since the answer depends upon a number of factors.

If we want the answer to be representative of market dynamics, Jones Act vessels and ships under comparable domestic trading regulations have to be exempt. Such protection-

The MSC VERONIQUE is part of a series of twelve former Maersk Line flagships, built at the A.P. Moller - Maersk Group's (then) own Odense Steel Shipyard in Denmark from 1988 to 1991. Eight of the sisters have already been broken up and three will remain for the time being - all trading for MSC.

When delivered, the vessels were among the largest container ships in the world, though Maersk was traditionally secretive about the 'true' carrying capacities of its ships and often understated actual intakes. Originally named with 'M-prefixes' the series was known as the 'Maersk M-class' or the 'M-class panamaxes'.

The panamax sisters are 294.12 m long and 32.30 m (13 rows) wide. They are powered by a MAN-B&W 10 K90MC main engine that delivers 35,350 kW. An electric booster motor can feed another 3,000 kW to the tail shaft to give the ships a top speed of 23 knots.

Maersk's iconic panamaxes were stalwarts on the carrier's high-capacity mainline services until larger ship classes, including various generations of Odense-built overpanamax ships, relegated them into second-tier loops.

The shipping line held on to the vessels for some 20 years, until it sold the ships off in the mid-noughties. Many of the sisters were then chartered back by Maersk under new names.

Today's MSC VERONIQUE for example was built as the METTE MAERSK and she remained under Maersk ownership until 2006. She was then sold to the non-operating owners Seaspan in 2006, with a charter back to Maersk under the new name MAERSK MERRITT.

Maersk then sublet the vessel to MSC for three years. During this time, the panamax ship traded as the MSC SWEDEN. In 2011, Seaspan then bare-boat chartered the vessel directly to MSC under the new name MSC VERONIQUE. In 2016, MSC then acquired the ship for only USD 5.0 M - less than half of her current scrap value.

Over the past few years, MSC traded the MSC VERONIQUE on numerous services including Far East - North America runs, South America services, Baltic Sea feeder, intra-Asia loops and services in the Middle East Gulf.

Very frequently, the ship also operated on the Atlantic, particularly on services to Montreal in Canada.

Now, the ship's schedules end in Mundra, India, from where she is expected to ballast to Alang for beaching.

ist laws typically hinder fleet renewal at market prices and make compliant tonnage artificially expensive.

Similarly, ships owned by the military or by governments and laid up in reserve have to be excluded.

Finally, setting a minimum size of 1,000 teu filters out many former container ships that have stopped hauling boxes and joined the general cargo or mini-bulker market.

This leaves the 1982-built MSC MALIN as the world's oldest 'real' container ship still in service at 41 years of age. The MSC MALIN was built in (then) East Germany by Warnowert under her original name KAPITAN KANEVSKIY.

Once the MSC VERONIQUE is gone, only three of the original 'Maersk M-class' ships will remain in service: all with MSC. These are the MSC SARISKA V (originally the MAJESTIC MAERSK), the MSC FEDERICA (MARIE MAERSK) and the MSC PILAR (MAGLEBY MAERSK).

Of these, the MSC SARISKA V will likely be the last survivor of the type since she has gone through a class drydock at Dubai last year.
