GENERAL VESSEL INFORMATION:

En escale à Brest pour passage en cale sèche voici un type de pétrolier très particulier baptisé "shuttle tanker", en bon Français "pétrolier navette", le **NORRISIA**. Ces navires font en effet la navette entre certaines bouées de chargement en Mer du Nord, et des ports de déchargement, souvent en Grande Bretagne.

Recently OSM Ship Management AS took over as technical manager for the MT KITTY KNUTSEN (ex Norissia, ex Gerina) The MT Kitty Knutsen is a shuttle tanker of about 127.000 dwt lately purchased by the Knutsen OAS Group in Haugesund. This 1981 built vessel is a sister ship of the MT Polytrader and the MT Polytraveller, two North Sea shuttle tankers, earlier in OSM operation for more than 20 years each.

The MT KITTY KNUTSEN is dedicated for loading at the Kittiwake Field at the UK sector of the North Sea.

www.osm.no - 10/12/2003

The KITTY KNUTSEN is 264 metres long. She is on a long-term charter to Venture Production and receives oil from the Kittiwake field, which is located around 100 miles East of Peterhead.

Emas Offshore Construction & Production, a subsidiary of Ezra Holdings, has awarded Keppel Shipyard the contract to convert a 127,500dwt shuttle tanker into an FPSO. The LEWEK FPSO 1 is to be delivered in mid-2008 for deployment in the Gulf of Thailand. www.oilonline.com/news - July 12, 2007

EOC Ltd.'s first floating production storage offloading vessel (FPSO) was officially christened LEWEK ARUNOTHAI on June 21 at a naming ceremony held at Keppel Shipyard in Singapore.

FPSO LEWEK ARUNOTHAI was converted from oil tanker M.T. Kitty Knutsen. The first part of the vessel's refurbishment and life extension was carried out at Keppel's Subic Shipyard in the Philippines, while the engineering, procurement and topside fabrication were in progress in Singapore. The vessel then sailed to Keppel Shipyard to complete the remaining conversion and integration of topside works.

The vessel is Keppel's first FPSO conversion project for EOC. To date, Keppel Shipyard has completed 76 FPSO and FSO projects with six more in progress. Its sister yard, Keppel Singmarine, is building a 30,000 bhp Multi-Functional Support Vessel for EOC's parent company, Ezra Holdings.

LEWEK ARUNOTHAI is equipped with 725,000-barrel storage and capable of exporting 175 MMscf/d of gas. Sources said the vessel is expected to depart Singapore for Thailand in July to start a three-year firm charter with PTTEP's Gulf of Thailand Arthit North gas project. The vessel will be connected to up to 50 wells and is to produce about 120 MMscf/d to 150 MMscf/d of gas from the third quarter of 2008.

PTTEP is entitled to exercise an option to extend the FPSO charter by another two years. Additional gas produced from the FPSO will be supplied to PTTEP's parent company, PTT Plc over the next three years. The FPSO charter is valued at around US\$400 million
