GENERAL VESSEL INFORMATION:**2022:****AAL swells operating fleet**

Adis Ajdin · October 13, 2022

Breakbulk and heavylift operator AAL has further expanded its owned multipurpose vessel fleet.

The Singapore-based operator recently took delivery of the 2010-built *AAL Gunsan*, former *BBC America*, and the 2009-built *AAL Geelong*, ex-*BBC Valparaiso*. The ships are the last of four 25,800 dwt multipurpose heavy lift sister vessels secured through an acquisition penned back in 2021 by AAL and its parent Schoeller Holdings Group.

The company further acquired the 2010-built 33,000 dwt *AAL Moon* during this summer, which was previously under its commercial management.

The new additions have helped lift AAL's carrier control to 90% of its current 864,800 dwt operating fleet.
