GENERAL VESSEL INFORMATION:

2010:

Dolphin

Joelmare in the midst of maintenance works.

Joelmare

Greek tanker Joelmare belonging to Dynacom Tankers Management Ltd took time out to recharge at Jurong Shipyard in the month of February 2010.

Measuring 228.00m x 32.20m x 19.60m, the 71,055 dwt oil tanker underwent a list of jobs, including water ballast tanks steel renewal, pump room's diesel oil tank new piping installations, pressure vacuum valves overhauling, and routine hull cleaning, blasting and painting.

Before the vessel set off in the same month, the yard also relocated the radio antenna mast, overhauled the sea valves, ballast pumps and inert gas fans as well as conducted lifeboat testing to ensure that safety requirements were met.

U.S. Treasury Targets Iran's 'Shadow Fleet' in Latest Round of Oil Sanctions

Mike Schuler
Total Views: 321
March 13, 2025

The U.S. Department of the Treasury's Office of Foreign Assets Control (OFAC) has announced a new round of sanctions targeting Iran's petroleum sector, including the designation of Iran's Minister of Petroleum and multiple shipping companies involved in transporting Iranian oil.

The sanctions specifically target Iran's so-called "shadow fleet" – a network of vessels used to disguise Iranian oil shipments primarily destined for China. OFAC identified 13 vessels in the scheme, including the Hong Kong-flagged *PEACE HILL*, which has transported millions of barrels of Iranian oil, and the San Marino-flagged *SEASKY*, which has moved tens of thousands of metric tons of fuel oil since early 2024.
