<http://www.worldshipsocietyrotterdam.nl>

The former Sealift/Frontline Suezmax tanker 'MARBLE', now owned by a subsidiary of DockwiseLtd., and renamed "**TRIUMPH**", has been accepted by Cosco Guangdong Shipyard on April 18, 2008. The conversion into a heavy lift vessel has started immediately by placing the vessel in drydock. The conversion from a tanker into a heavy lift vessel embodies the renewal of the entire midship section after removing the cargo section. Construction of the new midship section started October 2007 and is reaching the final stage of completion. The new midship of 130 x 44.5 x 14 mtr., which will replace the old midbody 174 x 44.5 x 24 mtr., will be joined to the original bow and stern conversion of the remaining single hull Suezmax tankers to semi-heavy lift vessels is in full progress and the last four vessels will, as earlier indicated, join the fleet during 2008, with "TALISMAN" in May.

The semi-submersible heavy lift vessel **TRIUMPH** now joins the fleet of Dockwise. The **TRIUMPH** is one of six single-hull tankers converted into heavy lift vessels at the Cosco Guangdong Shipyard. The vessel was delivered on December 16, 2008 and left for Singapore to load its first cargo on December 17, 2008.

The heavy transport vessel is designed to transport complex, high-value cargo and has a carrying capacity in excess of 35,000 tons. With an unobstructed deck area measuring 44.5 m x 130 m, the vessel is well suited for carrying semi-submersible and jack-up drilling units, as well as offshore structures. During the conversion, the entire midsection was newly constructed and fitted to the bow and aft part of the single-hull tanker. As a result, the classification authorities consider the vessel to have an economic life of around ten years, resulting in a remaining economic life of 20 years.

To ensure the most effective way of operating the vessel, Dockwise has appointed Anglo-Eastern Ship Management to provide technical and crew management. As such, the new vessels will operate under the same management systems as the existing

Dockwise vessels. Crews, superintendents and other personnel will therefore be completely familiar with all operating procedures, ensuring safe operations.

Width overall 45.00 m

Length overall 217.00 m

Deck space overall 5,785 sqm
