UASC is to revert to a two loop system on the Far East-Middle East-North Europe sector, with the split into two loops of the current AEC loop, giving birth again to the AEC 1 and AEC 2. The nine 4,250 teu ships planned to join the AEC 1 are all chartered newbuildings, with the lead ship, DOHA (to be renamed **UASC DOHA** - alias **BEATRICE SCHULTE**) delivered at the end of June.
