GENERAL VESSEL INFORMATION:

1992: In a ceremony held at the **Ishikawajima do Brasil Estaleiros S.A. (ISHIBRAS) shipyard in Rio de Janeiro, Brazil**, Jean Crain **christened Chevron's newest tanker, the WILLIAM E. CRAIN**, named for her husband, who is vice president for exploration and production and a director of Chevron Corporation. Under a contract with Mitsui & Co., Ishikawajima Harima Heavy Industries Company, Ltd. (IHI) of Japan, the **WILLIAM E. CRAIN is the final vessel in a series of four identical 150,000-deadweight-ton tankers built for Chevron by IHI and its Brazilian affiliate, ISHIBRAS.**

These four new tankers are replacing older vessels as part of an ongoing Chevron fleet retirement and renewal program. The WILLIAM E. CRAIN will carry approximately 1,100,000 barrels of crude oil on each voyage. Its size will allow it to be effectively utilized in any of a number of regular Chevron trades -- West Africa to the U.S. East Coast, Indonesia to the U.S. West Coast and the Middle East to the U.S.
