YAMAMARU KISEN KK since 20-01-2010

EX-NAMES:

NORD TRADITION	2010-	Ocean Transit Carrier S.A., Panama

GENERAL VESSEL INFORMATION:

Kawasaki Shipbuilding Corporation launched the **NORD TRADITION** bulk carrier for Ocean Transit Carrier S.A. at its Kobe Shipyard. The carrier, identified as Kawasaki hull No. 1619 and the 29th 55,100DWT bulk carrier developed by Kawasaki Shipbuilding, will be delivered in January 2010 after outfitting at the quay of the Shipyard. The 189.9 m vessel has a flush deck with forecastle and five holds that are designed for optimum transport of grains, coals, ores and steel products. A new proprietary bow designed to reduce wave resistance allows the ship to operate with less fuel. Four 30 ton deck cranes are installed in the center in between hatch covers to enable cargo loading and unloading in ports where no cargo handling facilities are available.
